# How do I activate the modules I purchase

Configure at system

Before using the gateway, it is recommended to activate with available modules. Administrator can use the online module activation download feature to get the available modules. Make sure the gateway is connected to Internet before using this feature. To do online module download, follow these steps:

1. Login to Admin GUI: System > Maintenance > Patch. Choose Module Activation tab.

2. Click button "Activate New Modules" to activate all modules available for your gateway.

Date	Module name	Installed By
08/01/2013 04:06PM	Management Port	root
08/01/2013 04:06PM	HA	root

Activate New Modules

Additional Note:

Common Issues of failed to update available modules online:

- WAN Interface setting is not configured properly for Internet Connection

| Patch | **Module Activation** | Service Contract |

Failed to connect to license server, please verify your Internet connection

Date	Module name	Installed By
06/11/2012 07:04PM	QoS	root
06/11/2012 07:04PM	Multi-WAN	root
06/11/2012 07:04PM	Management Port	root
06/11/2012 07:03PM	HA	root
30/07/2010 09:10AM	Lawful Intercept	
30/07/2010 09:10AM	Credit Card	
30/07/2010 09:10AM	Volume Accounting	
30/07/2010 09:10AM	Radius
