How do I configure an external syslog server
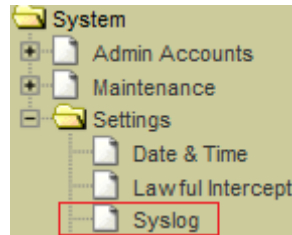

Configure at system

Navigate to Admin GUI: System > Setting > Syslog

Additional Note:

- Mirror system logs to a remote Syslog server – When selected the following system log information is sent to the Syslog server:
  o Email information
  o FTP login/logout information
  o Traffic information – You need to have lawful intercept module installed.
  o CLI Audit information

- IP Address – The IP address of the Syslog server to send to
